## AN APPEAL

Mrs. D'souza (Name changed) of Pant Nagar, today is a relieved mother. She recounts her harrowing tale when her one-and-a-half-year-old daughter Julie was declared autistic. That's the time Julie's harrowing nightmare began. She hardly slept, as she would get exhausted by the end of the day. Julie spoke just two words. "My husband would cry daily out of sheer helplessness", recalls Mrs. D'souza. But six months ago when they visited M. B. Barvalia Foundation's Spandan Holistic Childcare Center, Pant Nagar, their lives changed dramatically.

Julie was extremely cranky, at times snarlish & would scream whole night. Extremely restless, she would run during the day.

Once at midnight he was extremely frustrated & vexed with this, he took Julie on the terrace and was about to throw her down, he came down & cried bitterly that whole night.

Today, Julie is not hyperactive, she is less irritable, and responds to her parents' commands. She has even started speaking "We have forgotten that our child is autistic." Says Mrs. D'souza. "It's been six months my husband has not cried even once."

This became possible because of laborious, intensive, consistent and sincere inputs by the multidisciplinary team of the institute.

M. B. Barvalia Foundation's Spandan Holistic Institute is a registered public charitable trust. It was established in 1997 with objectives of promoting holistic health & value-based education. We are running several medical, educational & community-based programmes mainly in the "M" and "N" wards of the BMC. We are conducting following activities :

- Holistic child care center and special school – dedicated to children with disability.
- Holistic care for HIV and AIDS – Holistic humane approach for management of HIV disease.
- Comprehensive Homoeopathic mobile clinic which visits slum areas.

The uniqueness of our services lies in the fact that we are working in the most crucial but most neglected area in healthcare viz. disability and HIV/AIDS. We are catering to people from low socio-economic class. Through our mobile van, we are serving the most deprived and backward slum areas which literally touch the dumping ground.

We conduct free camps, through which we have helped thousands of disabled children and have been able to restore smiles in number of distressed parents.

Over the years, we realized that there is a great need of a hospital which will provide quality care in a cost-effective way. We have come closer to realization of our vision. Pleased by our efforts, the BMC has
